TECHNICAL SKILLS

- **Backend:** Python, FastAPI, REST API Design, Asynchronous Programming, JWT Authentication, Role-Based Access Control (RBAC), Microservices Concepts
- **Full Stack Skills:** Node.js, Express.js, API Architecture, Secure Authentication Flows, Error Handling, Middleware Design
- **Frontend:** React.js (Hooks), JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, Bootstrap, Tailwind CSS
- **Databases:** PostgreSQL, MySQL (schema design, optimization), MongoDB, Prisma ORM
- **Tools & Practices:** Git/GitHub, Postman, Clean Code, API Debugging, Code Reviews, Secure Coding, Performance Optimization

EXPERIENCE

Cynox Security LLP

Apr 2025 - Present

Web Developer.

- Designed, developed, and deployed scalable backend-heavy full-stack applications, building secure and high-performance RESTful APIs with strong authentication, authorization, and audit capabilities.
- Built large-scale Task Management and Vendor Risk Management systems with normalized data models, approval workflows, audit trails, and compliance-ready reporting.
- Designed modular backend architecture including helpers, middleware, and reusable service layers to improve maintainability and scalability.
- Applied backend design principles such as input validation, centralized error handling, structured logging, and API contract stability for frontend and mobile clients.
- Worked closely with database design and query optimization to ensure reliability, data integrity, and performance.
- Debugged production issues, optimized API performance, and strengthened application security.
- Currently expanding backend expertise in Python and FastAPI, focusing on asynchronous API development, clean architecture, and scalable system design.

North Delhi Public School

Nov 2023 - Sep 2024

Software Engineer

- Cleaned and structured institutional datasets including admissions and student records, improving data usability and reporting accuracy.
- Supported website workflows using WordPress, PHP, and SQL to enable enquiry and data collection systems.
- Built foundational experience in data handling, validation, and structured problem-solving.

PERSONAL PROJECTS

Task Management System

[Link](#)

- Cleaned and structured institutional datasets including admissions and student records, improving data usability and reporting accuracy.
- Supported website workflows using WordPress, PHP, and SQL to enable enquiry and data collection systems.
- Built foundational experience in data handling, validation, and structured problem-solving.

Compliance Audit System

[Link](#)

- Developed a risk and compliance workflow system enabling vendors to respond to dynamic questionnaires and generate structured risk insights.
- Designed RBAC-based role isolation for admin, auditor, and vendor users.
- Built secure authentication and authorization layers with scalable backend architecture.
- Ensured future scalability with asynchronous processing and microservices-oriented design.

Python & FastAPI Practice (Conceptual + Hands-on Learning)

[Link](#)

- Built and tested REST APIs using FastAPI with focus on async endpoints, validation using Pydantic, dependency injection, and secure authentication flows.
- Practiced API design including CRUD, filtering, pagination, error handling, and modular architecture.
- Implemented JWT-based authentication, role-based authorization, and structured backend design patterns.
- Focused on production-ready backend concepts such as scalability, performance, and maintainable architecture

EDUCATION

Indira Gandhi National Open University (IGNOU), New Delhi
MCA (Master of Computer Application) , Information Technology

2025 - 2027

Deshbandhu College
BSc (Bachelor of Science) in Computer Science (CS)

2021 - 2025

ACHIEVEMENTS

- Google It Support Professional Certificate
- CCBP 4.0 Intensive – NXTWave
